

Luo Wenjie

Product / AI Product Intern Candidate · NUS MSc · Multi-Agent & LLM Applications

Singapore · +65 80849140 · +86 18319496086 · e1576499@u.nus.edu · Graduating 2027.01

SUMMARY

NUS master's student (Transport & Urban Mobility) with **two product management internships** (auto OEM overseas product + internet PM) and **hands-on multi-agent / LLM systems**. Built function-calling agent pipelines, ran **200 paired experiments** with statistical evaluation, and designed a hybrid "rule propose + LLM approve" controller (**97.7% approval accuracy**). Taking **CEE5901QA/QB** (ML Foundations & Advanced AI Methods for CEE). Seeking **Product / AI Product internships in Singapore** (onsite, ~3+ months, Fall 2026).

EDUCATION

National University of Singapore (NUS) · MSc · Civil Engineering (Transport & Urban Mobility) English-taught · Multi-agent LLM systems, traffic simulation, statistical inference · CEE5901QA Machine Learning Foundations for CEE · CEE5901QB Advanced AI Methods for CEE	Aug 2025 – Jan 2027
Chang'an University · BEng · Transportation Engineering (Excellence Program) GPA 3.16/5.0 · Top 15% · Class Youth League Secretary · CET-6	Sep 2021 – Jun 2025

PRODUCT EXPERIENCE

Chery International · Product Manager Intern · China (Overseas product) • Mined Xiaohongshu VOC data; built 15 user personas and 5 deep reports for product definition and facelift decisions. • Planned KD localization milestones (Gantt); built bubble-chart sales views for regional product strategy. • Supported trial evaluation and dual-variant configuration checks; prepared import/export compliance materials. • Conducted win/loss and styling competitive analysis to feed iteration decisions.	May 2026 – Jun 2026
Colour Data · Product Manager Intern · Guangzhou • Authored 3 PRDs (scope, interaction, acceptance) with 100% review pass rate . • Delivered Axure prototypes for 5 core pages; fully adopted into development. • Wrote test cases, drove 10+ bug fixes; coordinated FE/BE/QA/ops for on-time launch.	Jun 2025 – Jul 2025
China Construction Far East Facade · Engineering Intern · Singapore • Coordinated 4 suppliers (e.g., Sika) for sampling and lab testing in an English workplace . • Built full-stack goods receiving app (React + Node + SQLite) for site inventory digitalization. • Automated email workflows / BI form filling; delivered Rhino 3D shading analysis for facade packages.	Jun 2026 – Present

AI / PRODUCT PROJECTS

Hybrid Multi-Agent Decision Framework (HDLF) · NUS Independent Research • Designed 5 agent types (baseline / rules / persona / local Qwen2.5-3B / cloud DeepSeek) with function-calling toolchains. • Built ~3.5k-line Python simulation stack; 200 paired experiments with Wilcoxon + Holm-Bonferroni testing. • Quantified when rule vs LLM agents win; validated with LTA DataMall bus data (793 routes / 5201 stops).	Jan 2026 – Apr 2026
3-Layer LLM Coordination Architecture · NUS Personal Project • BehaviorModeler / Policy Optimizer / Coordinator for mode-travel-transfer workflows (intent → plan → tools → feedback). • Hybrid "rule propose + LLM binary approve" controller: 97.7% approval accuracy , reduced state hallucination. • Analyzed LLM latency vs real-time constraints; proposed async pub-sub mitigations for stability.	Mar 2026 – Apr 2026

SKILLS

Product: <built-in method items of dict object at 0x000001B04E6C8240>
AI / Agents: <built-in method items of dict object at 0x000001B04E6C8280>
Data / Eng: <built-in method items of dict object at 0x000001B04E6C82C0>
Languages: <built-in method items of dict object at 0x000001B04E6C8300>

Open to Product / AI Product Internships in Singapore · Onsite 4–5 days/week · Available from Sep 2026 (flexible)
