

Luo Wenjie

Product / AI Product Intern Candidate · NUS MSc · Multi-Agent & LLM Applications

Singapore · +65 80849140 · +86 18319496086 · e1576499@u.nus.edu · GitHub: github.com/LUOaini1213 · Graduating 2027.01

SUMMARY

NUS master's student (Transport & Urban Mobility) with **Singapore engineering internship** (Far East Facade: Grok Build automation, Rhino 3D, full-stack site tools), **two PM internships** (auto OEM overseas product + internet PRD/prototype), and **hands-on multi-agent / LLM systems**. Built function-calling agent pipelines, ran **200 paired experiments** with statistical evaluation, and designed a hybrid "rule propose + LLM approve" controller (**97.7% approval accuracy**). Taking **CEE5901QA/QB** (ML Foundations & Advanced AI Methods for CEE). Seeking **Product / AI Product roles** (internship or 2027 full-time; Singapore / China hubs).

EDUCATION

National University of Singapore (NUS) · MSc · Civil Engineering (Transport & Urban Mobility) Aug 2025 – Jan 2027
English-taught · Multi-agent LLM systems, traffic simulation, statistical inference · CEE5901QA Machine Learning Foundations for CEE · CEE5901QB Advanced AI Methods for CEE

Chang'an University · BEng · Transportation Engineering (Excellence Program) Sep 2021 – Jun 2025
GPA 3.16/5.0 · Top 15% · Class Youth League Secretary · CET-6

PRODUCT EXPERIENCE

China Construction Far East Facade · Engineering Intern · Singapore Jun 2026 – Present

- Used **Grok Build** for day-to-day **agentic coding** in live JOB folders: mail automation, BI form-fill, ledger sync, document batch tools; incremental delivery with independent re-verification.
- Built multi-building **Rhino** façade workflows on VMU .3dm models: **3D shadow studies**, appearance/color review, figures for design review and site alignment.
- Shipped full-stack **goods-receiving app** (React + Node + SQLite): master data CRUD, barcode/QR, scan-to-fill, photo evidence for site inventory digitalization.
- Automated Windchill / POR-VMU pipelines (Outlook + Playwright): attachment pull, site-vs-factory classification, integrity reports, BI auto-fill (packable exe); supplier sampling (e.g., Sika) in an **English workplace**.
- E-Filing naming/folder compliance scans, PQP 16:9 batch normalization, DOC→PDF quality checks; technical submission chase and cross-team site coordination.

Chery International · Product Manager Intern · China (Overseas product) May 2026 – Jun 2026

- Mined Xiaohongshu **VOC** data; built **15 user personas** and 5 deep reports for product definition and facelift decisions.
- Planned KD localization milestones (Gantt); built bubble-chart sales views for regional product strategy.
- Supported trial evaluation and dual-variant configuration checks; prepared import/export compliance materials.

Colour Data · Product Manager Intern · Guangzhou Jun 2025 – Jul 2025

- Authored **3 PRDs** (scope, interaction, acceptance) with **100% review pass rate**.
- Delivered **Axure prototypes** for 5 core pages; fully adopted into development.
- Wrote test cases, drove 10+ bug fixes; coordinated FE/BE/QA/ops for on-time launch.

AI / PRODUCT PROJECTS

Hybrid Multi-Agent Decision Framework (HDLF) · NUS Independent Research Jan 2026 – Apr 2026

- Designed **5 agent types** (baseline / rules / persona / local Qwen2.5-3B / cloud DeepSeek) with **function-calling** toolchains.
- Built ~3.5k-line Python simulation stack; **200 paired experiments** with Wilcoxon + Holm–Bonferroni testing.
- Quantified when rule vs LLM agents win; validated with LTA DataMall bus data (793 routes / 5201 stops).

3-Layer LLM Coordination Architecture · NUS Personal Project Mar 2026 – Apr 2026

- BehaviorModeler / Policy Optimizer / Coordinator for mode–travel–transfer workflows (intent → plan → tools → feedback).
- Hybrid "rule propose + LLM binary approve" controller: **97.7% approval accuracy**, reduced state hallucination.
- Analyzed LLM latency vs real-time constraints; proposed async pub-sub mitigations for stability.

SKILLS
