PROFILE

AI product experience spanning requirements, prototypes, customer research and engineering coordination. Build agent workflows with clear metric definitions, human approval and measurable acceptance criteria.

EDUCATION

National University of Singapore | MSc Civil Engineering | Aug 2025 – Jan 2027

Transport focus; research in transportation information and control.

Chang'an University | BEng Transportation Engineering | Sep 2021 – Jun 2025

GPA 3.16/5.0; approximately top 15% of the cohort.

EXPERIENCE

Far East Facade | Engineering Intern | Jun 2026 – Present

- Coordinated sampling and tests with four suppliers, kept material-receipt records, and used Python to parse shipment emails.

Chery International | Product Intern | May 2026 – Jun 2026

- Created 15 personas and 5 VOC reports; combined competitor win/loss analysis with vehicle length, price and registration data to inform overseas market positioning.

Caixun Technology | Product Intern | Jun 2025 – Aug 2025

- Moved a hard-to-find prize-draw entry from the page bottom to a side pop-up; defined requirements, designed prototypes and followed development and testing.
- Wrote 3 PRDs and prototyped 5 core pages in Axure; the proposals were accepted. Tracked fixes and retesting, helping resolve more than 10 issues.

PROJECTS

Civil Buddy | Engineering Agent Workspace | Jul 2026 – Present

- Designed the packing path from material input to tool-computed container counts and coordinates, then human confirmation.
- Wrote the packing PRD and acceptance checklist. A 128-run deterministic evaluation returned `can_fit=true` on 71 runs and false on 57. A pass means the tool returned a count and a fit flag.

Counterask | Conversational WebMCP Storefront | Sep 2026

- Asked a clarifying question when an answer would have been a guess. The live store is counterask-webmcp; an earlier sibling repository is archived.
- On 9,901 products, Hit@10 was 0.993 on 800 generated queries and 0.991 on held-out phrasings. Regression checks covered budget and negation.

Malaysia Automotive Data Assistant | Aug 2026

- Separated wholesale from registrations with a metric dictionary, approved SQL templates and table-level lineage.
- On an earlier fixed-SQL self-test, 22 of 30 authored questions returned a number and 8 stopped for clarification.

SKILLS

Product: requirements, PRDs, Axure, voice-of-customer analysis, personas, acceptance criteria.

AI products: tool calling, human approval, evaluation; Python, SQL, Excel.
